BUMOTEC is...

Specialised in manufacturing CNC machines for machining complicated parts, Bumotec has achieved a solid reputation in the watch industry. With the experience gained during more than 2 decades, the firm is able to present a wide range of machine-tools to diverse customers and very cosmopolite, on many continents. Year after year, Bumotec has expanded it's activities with success to various other industrial sectors: medical, connectic, lenses, light industry, textile and automotive.

Some sectors of application...

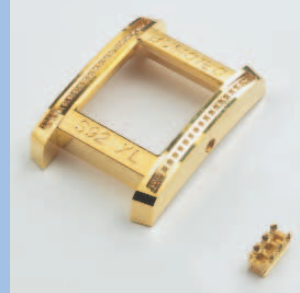

Aerospace

Medical

Light industry

Jewellery

Watch industry

Automobile industry

Micro-mecanic

Connectic

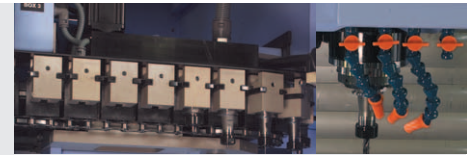

Machines

CNC machining centre

Our products are composed with machining centre from 3 to 5 simultaneous axes able to work from the bar or piece by piece.

S-92 XL CNC

Machining centre, 5 axes working from bar or piece by piece.

Mill and turn CNC centre

Our products are composed of mill and turn centre from 2 to 8 axes mono or twin spindle for machining simultaneously, and a bar passage of 32/42/65 mm. These centres can be equipped with 2 turrets of 16 tools.

S-188 CNC

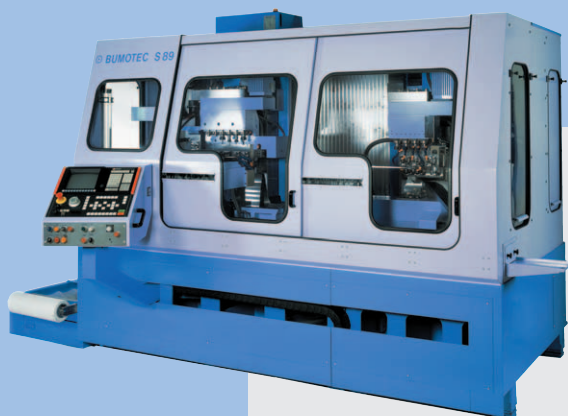

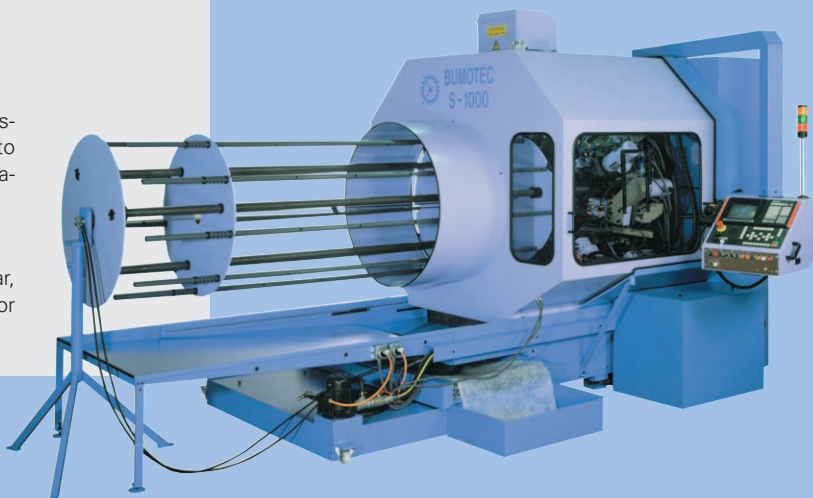

Turn and mill centre twin spindle 2 turrets of 16 tools and a bar passage of 32/42 mm. Maximum rotation speed of the two spindles: 6000 Rpm's.

CNC transfer machine

Our products are composed of horizontal transfer machine or vertical transfer machine upto 49 cnc axes, 2 to 12 stations working simultaneously.

S-1000 CNC

Horizontal transfer machine working from bar, 8 or 12 stations (machining unit, vertical frontal or tiltable) upto 32 CNC axes.

CNC mono or multi spindles milling machine

Our products are composed of milling machine from 3 to 10 axes, upto 27 spindles, working from 1 to 4 bars or piece by piece.

S-89 CNC

Milling centre with 2 stations working simultaneously, feeding by bar, 27 spindles (frontales, verticales, tiltable).

Drilling machine

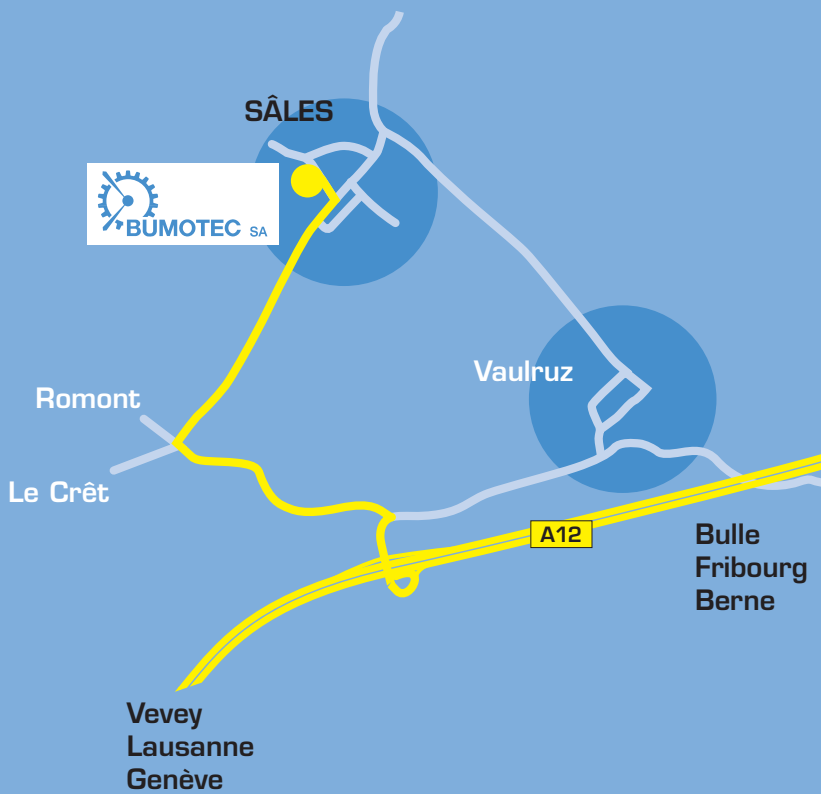

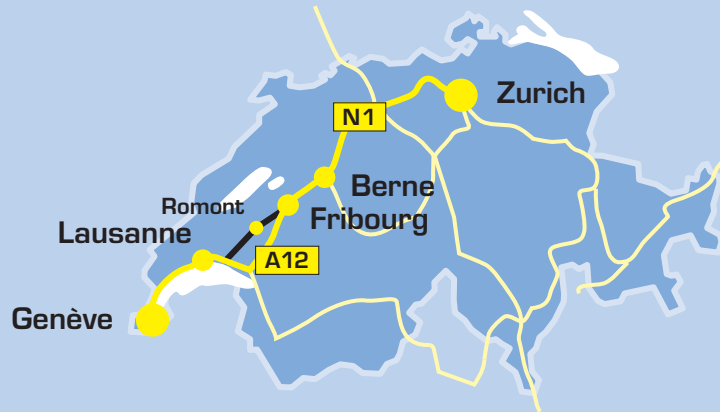

Our products are composed of 2 types of drilling machines, one working with bar S-18 and the S-20 working piece by piece.

S-20 CNC

Retaking machine for drilling bracelets link, equipped with a turning table and 2 machining stations working simultaneously.

Access

ACCESS

From Genève-Cointrin airport
From Zurich-Kloten airport

TRAIN

Fribourg railway station
Romont railway station
Lausanne railway station
then picked up by Bumotec

CAR

Highway A12
Exit Vaulruz
then take direction Romont
turn to Sâles
